

# Industry 4.0 for Leaders: Digital Transformation Strategies

Today's industrial leaders have a tough balancing act – managing day-to-day operations while driving a digital transformation strategy that promises huge improvement and disruption. While Industry 4.0 is not at all new, the technological possibilities are constantly changing and much of the guidance available in the market is provided by technology providers with a promise that their technology will solve operational headaches like unplanned downtime, cost overruns, unreliable equipment, etc.

This four-hour virtual Zoom workshop, will prepare leaders to build a “smart culture” that can successfully navigate a digital transformation, thrive in an increasingly digital environment, and drive smart operations.

LCE's asset management and reliability subject matter experts, who have guided numerous operations through successful transformations, will lead participants through:

- Building a case for digital transformation
- Assessing readiness for digital transformation
- Developing a transformation roadmap for operations
- Equipping the workforce for a new way of operating
- Analyzing case studies of industrial digital transformations

In addition to the course resources and templates, participants will receive access to the LCEsmatr Playbook, a cloud-based toolkit and training solution for digital, reliability, and asset management transformations.

All students completing this course will receive a certificate of completion awarding 0.4 CEUs.

Your training needs are unique. Unique needs may require on-site training, tailored for your environment, at a time convenient for you. For more information, please contact the Life Cycle Institute Team at [education@LCE.com](mailto:education@LCE.com).

## Target Participant:

The course is for leaders within asset-intensive organizations (manufacturing and industrial facilities) who are responsible for implementing Industry 4.0 technologies to cost-effectively boost performance and gain competitive advantage in their industry.
